- English

PROFILE INFO

As a skilled Frontend Web Developer, I bring extensive experience in React, Vue, and Angular frameworks, along with a strong foundation in HTML, CSS, and JavaScript. I have successfully developed and deployed interactive and responsive websites, demonstrating my ability to transform design concepts into functional and visually appealing user interfaces.

In addition to my frontend expertise, I am currently expanding my skill set to include backend technologies such as Node.js, MongoDB, and MySQL.

PROJECT EXPERIENCE

El's Worth
React   Project
https://elsworth-b.netlify.app/
A company website for electrical products and services. A user can login or signup in order to buy a product or request for a service such as electrical wiring
